Recommendation:

Time: Time management is nothing more than a process for effectively managing time for your work. It doesn't require much effort, but good planning is essential..

Work: Never Stop Learning. One of the most powerful things to advance your career -- or in any circumstance for that matter -- is knowledge. ... Work On Goals. ... Be Organized. ... Be A Team Player. ... Value Your Network. ... Value Your Health. ... Focus On Results. ... Speak Up.

Ask for help: Earn responses to your requests by generously helping others in the first place. ... Know what you want to ask. ... Ask SMARTly. ... Don't assume you know who and what people know. ... Create a culture where asking for help is encouraged
